

SERVICES

DERMATOLOGY

Skin diseases like fungus and parasites external and internal are very common and have to be treated professionally for the better life quality and health of your pet. We can offer your pet highly effective treatments for all this problems!

Parasites and fungus can severely infect your animal's skin and even cause General disease.

During consultation a check-up of the skin is basic procedure.

A specific **Dermatology consultation** will include:

- Skin scrapings for microscopic survey
- Checking for fungus with Woods lamp and Culture test.
- Skin biopsy in case of skin-change.
