

# SERVICES

## INTERNAL MEDICINE

We provide a fast and wide range of laboratory tests which plays a big role in detection of health changes in your pet. Our Veterinary Surgeon can discover blood disorders, kidney and liver diseases, infections, diabetes, high cholesterol and hormonal problems.

Blood tests are necessary for the well being of your pet.

In home laboratory:

- Blood chemistry
- FeLV/FIV tests for cats
- Parvo test for dogs

Blood sampling for external laboratory:

- Hematology
- Serum tests like Rabies and Toxoplasmosis
